WHAT IS BACTERIA CONTENT?

Bacteria are factories that produce enzymes. The enzymes digest their food of choice. Different bacteria produce different enzymes that feast on different substrates. The bacteria content is measured by microbiologists using CFU or colony forming unit.

USER TIP

- **Enzi-It** - Enzymes such as amylase, protease, lipase, and cellulase are produced and regenerated by this product, thus multiplying the product's effectiveness.
- **Grand Opening** - When added to organic waste, the enzymes immediately begin to breakup complex organic waste molecules while eliminating odors.
