### RECOMMENDED COMPATIBLE PRODUCTS

Rinse & Neutralizer (I30)

(pg. 74)

### WHAT ARE GEMINI SURFACTANTS?

Gemini surfactants have two hydrophilic head groups, in contrast to conventional surfactants that have a single hydrophilic head. Gemini surfactants can be up to a thousand times more surface active than conventional surfactants.

### USER TIP

Yarn and acid dye is heat set into the dye sites of carpet at a pH of 2. Therefore, it is important to use a rinse and neutralizer after using the extraction cleaners in order to bring the carpet fibers back to an acidic pH of 5-7, in order to avoid oxidation and color loss.
