Look out for fake bills

There are a few easy things you can do to help prevent counterfeit bills from getting through. Feel the bill first. Real US currency is made from fabric, not just paper. Hold the bill up to a light and check for tiny vertical printings next to the portrait that repeats "USA" and the denomination. Look for a small watermark image of the portrait. And check for color-shifting ink on the number at the lower right—it should go from green to black or copper when tilted.
