

3M

A – B Maintenance Sorbent Lightweight, versatile, and takes just minutes to put in place. Dust-free and contain no abrasive granules that can damage expensive equipment. Can be incinerated or fuel blended, leaving less than 0.2% ash. Wring out and reuse numerous times with virtually no loss of sorbent capacity. Allows you to get at the source of a leak before it becomes a bigger problem.

A High-Capacity Maintenance Folded Sorbent Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means you stock one product to meet your sorbent needs. Perforations every 16 inches allow you to select the length required, so there's less wasted sorbent. Comes in a handy dispenser box for easy, on-site use. 3M's high capacity sorbent technology: has increased fluid-holding capacity which means less sorbent used; allows for simple reclamation for recycling of valuable liquids and re-use of sorbent; and minimizes sorbent waste for disposal.
