B AVR Series UPS Battery Backup System Designed to provide reliable battery backup that can keep a basic desktop PC operational for up to 45 minutes during blackouts and shutdown safely in case of a prolonged power outage. Automatic voltage regulation (AVR) corrects low-voltage conditions (brownouts) back to safe 120V power without draining the UPS battery. Surge suppression and EMI/RFI line noise filtering prevent hardware damage and poor-quality audio and video performance. Dataline surge protection. USB ports work with free unattended shutdown software. \$100,000 Ultimate Lifetime Insurance. Manufacturer's three-year warranty.

C VS Series UPS Systems Ideal protection for PCs, workstations and small servers. Automatic voltage regulation (AVR) corrects low-voltage conditions (brownouts) back to safe 120V power without draining the UPS battery. Included dataline connectors provide protection for all connections. USB ports work with free unattended shutdown software, so your files are saved in the case of a blackout, even when you are not there. Support battery replacement via built-in access panel. \$200,000 Ultimate Lifetime Insurance. Manufacturer's three-year warranty.
