

CHOOSE PLASTIC TYPE AND GAUGE

BUYING GUIDE Can Liners

**LOW-DENSITY BAGS (LOW-D BAGS)**

Used for rough objects under tough transport conditions. These liners are very strong and more resistant to tearing, but handle lower load capacities than Hi-D liners. The thickness of low-density liners is measured in mils. One mil equals one-thousandth of an inch. In general, the larger the waste can, the more mils needed for the liner.

**Suggested Low-D Applications**

- Sticks
- Plastic eating utensils
- Rough yard trimmings
- Abusive transport conditions
- Metal with sharp edges
- Glass bottles
- Objects with rough corners
- Food with rough edges (crab legs)

**HIGH-DENSITY BAGS (HI-D BAGS)**

Used for paper and non-rough objects under moderate transport conditions. These liners are very strong and handle higher load capacities than Low-D liners, but are less resistant to tears once punctured. The thickness of high-density liners is measured in microns. One micron equals one-thousandth of a millimeter. In general, the larger the waste can, the more microns needed for the liner.

**Suggested Hi-D Applications**

- For office waste baskets
- Dirt, grass, rags
- Paper, paper plates/cups
- Cans without sharp edges
- Food without sharp edges
- Smooth heavy objects

MATCH LINER WITH YOUR CAN

GOOD'nTUFF

**A Waste Can Liners** Durable "Econo Liners" are ideal for light-duty applications where frequent collection is the norm. Star-seal bottom helps distribute loads evenly while minimizing the potential for messy leaks. Translucent.

ultra PLUS

**B Can Liners** High-density can liners keep office-waste contained. Star-seal bottom ensures even weight distribution and provides added leak resistance. Low-count coreless rolls deliver easy, one-at-a-time dispensing while making storage simple.
